

ENROLL US!

We Want to Be a Partner in EPA's
National Partnership for Environmental Priorities

IDENTIFYING INFORMATION

Name of Organization: Xerox
Principal Contact: George Lundberg
Authorizing Official: Robert C. Buchanan
Address: 26600 SW Parkway Ave.
Phone/Fax: (503) 685-2758 / (503) 685-3838
EPA RCRA ID Number: ORD-000409581

Facility Name: Xerox Office Group – Wilsonville
Title: Health & Safety Programs Manager
Title: Director, Environmental Health & Safety
City/State/Zip: Wilsonville, OR 97070
Email: george.lundberg@xerox.com
Date: June 23, 2006

PARTNER AGREEMENT

Our organization is choosing to become a partner in EPA's National Partnership for Environmental Priorities. Our goal is to reduce the quantity of one or more Priority Chemicals currently found in our products, processes, or releases using techniques such as source reduction, recycling, or other materials management practices. In this enrollment application, we identify one or more voluntary goals that we believe we can achieve as partners in this program. The voluntary goal(s) provided below is an initial estimate and may change over time. We may revise our goal(s) or withdraw from the program at any time. If/when we choose to revise our goals or withdraw from the program, we will notify EPA.

GOAL #1. Chemical Name: Lead **CASRN:** 7439-92-1

Narrative description of proposed project: We plan to discontinue the use of lead-based solder in prototype circuit boards. The circuit board prototype development group has been working to eliminate lead solder to address RoHS requirements. We have been transitioning to no-lead solder paste and the use of lead-free solder in the wave solder flow machine. This change will eliminate the lead solder paste debris generated from the application of the solder paste, solder dross generated from the wave solder process, and lead sludge from cleaning/removing paste from stencils.

How we will measure success: We will calculate the amount of lead that we would have used had we not changed our soldering process.

1a. Our voluntary **source reduction** goal for Chemical #1 is to reduce the amount of this chemical generated/used from a baseline amount of 118 pounds in June, 2006 (month/year) to a reduced amount of 0 pounds generated/used by December, 2006 (month/year).

1b. To accomplish this goal, we will use the following source reduction options (check all that apply):

- | | |
|--|---|
| <input checked="" type="checkbox"/> Equipment or technology modifications. | <input checked="" type="checkbox"/> Process or procedure modifications. |
| <input type="checkbox"/> Reformulation or redesign of products. | <input checked="" type="checkbox"/> Substitution of less toxic raw materials. |
| <input type="checkbox"/> Improvements in inventory control. | <input type="checkbox"/> Improvements in maintenance/housekeeping practices. |
| <input type="checkbox"/> Other (describe): _____ | |

2a. In addition to, or in lieu of using source reduction methods, our voluntary **recycling or recovery** goal for Chemical # 1 is to increase the recycled or recovered quantity of this chemical from a baseline amount of _____ pounds in _____ (month/year) to an increased quantity of _____ pounds by _____ (month/year).

2b. To accomplish this recycling or recovery goal, we will use the following options (check all that apply):

- | |
|--|
| <input type="checkbox"/> Direct use/reuse in a process to make a product. |
| <input type="checkbox"/> Processing the waste to recover or regenerate a usable product. |
| <input type="checkbox"/> Using/reusing waste as a substitute for a commercial product. |
| <input type="checkbox"/> Other (describe): _____ |
